Hyderabad

SUMMARY

- Senior MLOps & DevOps Engineer with 6+ years of experience building and operating CI/CD, MLOps, and DevSecOps pipelines for enterprise and AI/ML workloads across Azure and AWS.
- Currently lead DevOps and MLOps for GenAI and RAG/LLM applications at Deloitte, owning end-to-end pipeline delivery, security, and production operations for life-sciences and multi-GBU enterprise clients.
- Proven track record of scaling user adoption, automating infrastructure with Terraform and Bicep, and embedding security and governance into deployment workflows using Azure DevOps, GitHub, Kubernetes, and Argo CD.
- Strong Python and Shell scripting skills for automation, validation, security scanning, and workflow orchestration — focused on reliable, scalable AI/ML infrastructure delivery.

TECHNICAL SKILLS

- Core Strengths:** Azure DevOps, Terraform, Bicep, CI/CD, Docker, Python, Shell/Bash, Databricks & Unity Catalog
- DevOps & MLOps:** Azure ML, Azure Data Factory, Argo CD, Metaflow, GitHub Actions, YAML, DevSecOps (security scanning, vulnerability remediation)
- Cloud & Infrastructure:** Azure (primary), AWS (fundamentals), Kubernetes / AKS (working knowledge), Linux (RHEL, CentOS), Windows
- Monitoring & Alerting:** Datadog, Opsgenie, ELK Stack
- Databases:** PostgreSQL, SQL, Snowflake, MongoDB (learning)
- Languages & Scripting:** Python, Bash, YAML, PowerShell
- AI/ML:** Machine Learning, Deep Learning, CNN, RNN, RAG/LLM workflows
- Version Control:** Git, Azure Repos

Certifications

- NVIDIA:** NCA-AIIO (AI Infrastructure & Operations), NCA-GENL (Generative AI LLMs), NCA-GENM (Generative AI Multimodal)
- Microsoft Azure:** AZ-900, AI-900, DP-900
- Google:** Data Analytics Specialization

Venkatesh Beeraka

SENIOR MLOPS & DEVOPS ENGINEER

PROFESSIONAL EXPERIENCE

Senior MLOps & DevOps Engineer

Deloitte | Hyderabad

GenAI & MLOps Platform Delivery for Life-Sciences & Construction Clients

- Lead DevOps and CI/CD** for a multilingual **RAG/LLM application** for a life-sciences client, **scaling adoption from 3K to 10K users** and improving research and document-retrieval **productivity by ~30%**; designed GitHub and YAML pipelines automating builds, testing, and deployments while contributing to Python REST API and PostgreSQL backend development.
- Operate end-to-end MLOps workflows** across multiple data-science use cases using **Argo CD, Metaflow, Snowflake, AWS, and Streamlit**, covering model deployment, monitoring, and scalable, reproducible production rollouts.
- Serve as DevOps and infrastructure lead** across **5 GenAI applications** using Azure DevOps, Azure cloud, Git, and monitoring tooling — reviewing architecture documents and deployment workflows, translating stakeholder requirements into technical plans, and coordinating cross-functional teams; enabling adoption across multiple **global business units (GBUs)** with an early-stage **~20% productivity gain**.
- Own DevSecOps** for all 5 GenAI applications, building security into CI/CD pipelines — implementing **security checks, vulnerability scanning, and remediation** to harden deployments across the workflow.
- Troubleshoot complex multi-resource cloud deployments** across networking, frontend/backend integration, code merges, and gateway/connectivity errors, ensuring reliable releases into production environments.

Jun '25 - Present

MLOps & DevOps Engineer

Fractal Analytics Pvt Ltd | Bengaluru

MLOps & Infrastructure Automation for Automobile Client

- Built 10+ MLOps pipelines** across **4 environments** using Azure ML, Azure Data Factory, and Azure DevOps (YAML) with Bicep-based provisioning, streamlining model training, deployment, and monitoring — contributing to a client product launch that grew their **online reach by ~25%**.
- Implemented Databricks Unity Catalog governance** through **5 reusable workflows** comprising **~20 multi-stage pipelines**, adopted across multiple teams as reusable components to manage data access, permissions, and enterprise-wide governance.
- Orchestrated automation of an enterprise service desk** using Python workflows, access approvals, and **Terraform-driven infrastructure deployment**, streamlining Azure cloud and data-resource provisioning for an automobile client.
- Designed and managed CI/CD pipelines** with Terraform, Azure DevOps, and GitHub, embedding Python and Shell scripts for validation, security scanning, notifications, and automated Jira ticket updates.

Apr '23 - Jun '25

Cloud DevOps Engineer

Tata Consultancy Services | Bengaluru

Cloud migration Project for Banking Client

- Designed and implemented 5+ CI/CD pipelines** across **3 environments** using Bicep and Terraform for a banking-sector cloud migration, improving deployment consistency and infrastructure reliability.
- Automated infrastructure and DevOps workflows** using Shell/Bash and YAML, **reducing manual deployment effort by ~40%** across complex multi-stage processes.

May '22 - Apr '23

Azure DevOps Engineer

Accenture Solutions Pvt Ltd | Bengaluru

Cloud migration project for Telecommunications client, Automation Projects

- Developed and deployed 25+ CI/CD pipelines** using Azure Pipelines across **2 enterprise clients**, automating application delivery for a telecommunications cloud-migration program and supporting their cloud-adoption strategy.
- Managed database deployments and backup/restoration** across environments using Azure CI/CD and Azure Data Studio, ensuring data consistency, integrity, and availability.

Dec '19 - May '22

EDUCATION

Executive Post Graduate Programme in Machine Learning and Artificial Intelligence

IIITB- Bangalore | Bengaluru

Apr '22 - Apr '23

Bachelor of Technology in ECE

Godavari Institute of Engineering and Technology | Rajahmundry

Jun '15 - May '19
